

# **OUR JOURNEY**

Bokio started in 2012 in Sweden, when co-founders Viktor and Mikael wanted to automate and revolutionise traditional bookkeeping by using Artificial Intelligence. The result is Bokio, a completely free, innovative and user-friendly accounting software which now has over 70,000 users.

Bokio has come a long way since the start - we are now an international team of more than 40 employees from 9 different nationalities and still growing. With a young CEO (Viktor is only 28) at the head of a fast scaling team, working at Bokio is challenging, fun, fast-paced and innovative.

The software not only facilitates accounting but also invoicing, tracking expenses and more. Bokio offers an all-in-one solution to help people run businesses smoothly.

Bokio is looking towards an ambitious future. We are expanding to new global markets outside of Sweden with a UK launch in early 2019. Bokio is growing quickly with an increasing team of specialists developing the product and an expanding base of new users.

#### **ACCOUNTING THE BOKIO WAY**

When you own a business you want to spend your time growing your company, not doing your accounting. Traditional bookkeeping can be difficult and time-consuming, so we wanted to make it easier to do bookkeeping for free with a simple step-by-step process. Bokio is designed for small business owners and self employed persons to be able to do bookkeeping themselves quickly, easily, and most importantly for free.

Using Bokio means there's no need to be an expert in accounting to get it done quickly and easily. Our Al algorithm reads the numbers in receipts and other documents to bookkeep, saving both time and money. Bokio has an <u>extensive list of features</u> available at totally free.

If you're curious about how we make money as a free software, then you can <u>read more</u> <u>about it here</u>.
